L5 ANSWER 1 OF 7 USPATFULL on STN

TI Leptin-related peptides

AB The present invention relates to methods and compositions containing novel leptin peptides, preferably for the modulation of body mass (i.e., weight), more specifically for novel diagnostic and therapeutic applications in homeostasis of body weight and adipose tissue mass.

CAS INDEXING IS AVAILABLE FOR THIS PATENT.

ACCESSION NUMBER: 2004:57925 USPATFULL

TITLE: Leptin-related peptides

L5 ANSWER 2 OF 7 USPATFULL on STN

TI Methods and materials relating to CD39-like polypeptides
AB The invention provides novel polynucleotides isolated from cDNA libraries of human fetal liver-spleen and macrophage as well as polypeptides encoded by these polynucleotides and mutants or variants thereof. The polypeptides correspond to a novel human CD39-like protein. Other aspects of the invention include vectors containing polynucleotides of the invention and related host cells as well as processes for producing novel CD39-like polypeptides, and antibodies specific for such polypeptides.

CAS INDEXING IS AVAILABLE FOR THIS PATENT.

L5 ANSWER 3 OF 7 USPATFULL on STN

TI Libraries of expressible gene sequences
AB The invention described herein comprises libraries of expressible gene sequences. Such gene sequences are contained on plasmid vectors designed to endow the expressed proteins with a number of useful features such as affinity purification tags, epitope tags, and the like. The expression vectors containing such gene sequences can be used to transfect cells for the production of recombinant proteins. A further aspect of the invention comprises methods of identifying binding partners for the products of such expressible gene sequences.

CAS INDEXING IS AVAILABLE FOR THIS PATENT.

TI Methods for regulation of immune responses to conditions involving mediator-induced pathology
AB The present invention relates to methods for inhibiting the release and/or biological activity of the cytokine macrophage migration inhibitory factor (MIF). In particular, the invention relates to the uses of such methods for the treatment of various conditions involving mediator-induced diseases or pathology, which include, but are not limited to sepsis, severe sepsis, septic shock, inflammation, graft versus host disease, and/or autoimmune diseases.

CAS INDEXING IS AVAILABLE FOR THIS PATENT.
